

FITS ALL – BIG AND SMALL

Smart design means this set of brackets can fit anything from a 15" LCD to a huge 65" LCD screen. A variety of screws are included to fit different monitors.

ONE TOOL BRACKET

Unique thumb-screws mean no screwdriver is required to attach the bracket to the back of the flat-screen – just use your hand! You just need one tool to attach the brackets to the wall.

FASTEST INSTALLATION EVER!

Vision has done away with the plate which normally attaches to the back of the screen cutting down the unnecessary parts you pay for and assembly time.

STRONG MACHINED PARTS

High tolerance cast-alloy brackets and milled thumbscrews slot together neatly to give a secure fit.

TEMPLATES INCLUDED

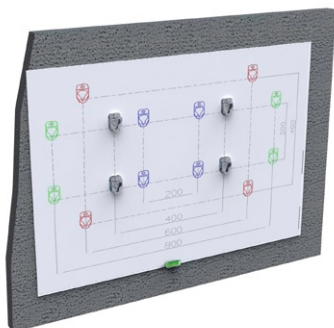

Mildly sticky paper templates with pre-printed VESA layouts assist with positioning of brackets on the wall.

SPIRIT LEVEL

Vision includes a calibrated level to help make sure everything is level.

CLOSE TO WALL

The TM-LCD holds the monitor a mere 10mm away from the wall and comes with wall attachment fixtures for large and small monitors.
